ABOUT ME

I am an enthusiastic and dedicated second-year university student with a strong academic record and a passion for research. I am a former national-level gymnast, with an interest for sports and the human body. In addition to my academic pursuits, I am a crafty individual, who enjoys hands-on projects that require creativity and problem solving skills.

WORK EXPERIENCE

CASHIERING/RETAIL SALES ADVISOR

Sportchek (2023-Present)

Provided knowledgeable assistance to customers, helping them to find products and offering recommendations based on their needs. Organized and displayed clothing and footwear to enhance the shopping experience and drive sales. Efficiently handled cash transactions, processed payments, and provided excellent customer service at the checkout. Assisted in inventory management, stocking shelves and ensuring products were accurately labeled and priced. Maintained a clean and organized store environment, including regular cleaning of the sales floors, fitting rooms, and public bathrooms.

SMALL BUSINESS PRODUCT DEVELOPER AND SALES ADVISOR

The Honey Merchants (2023-Present)

Collaborated closely with the business owner in a commercial kitchen setting to create and refine a range of products. Responsibilities included ensuring strict adherence to sanitization protocols and overseeing the labelling and packaging protocols to meet quality standards. Played a key role in selling products at various local farmers markets, engaging with customers, providing product information, answering questions, and driving sales. Aided in the setup and takedown of market booths, ensuring an organized and professional presentation.

SCRUBS RESEARCH SUMMER STUDENTSHIP

South Campus Research Unit For Bone and Soft Tissue (May 2025-Present)

Worked with a team of orthopedic surgeons and research personnel to collaborate on research projects, including the organization of patient files and data, being present for patient visits, and focusing on outcome-based measures for assessing patient recovery. Played a supportive role in research regarding musculoskeletal injuries, ensuring to adhere to privacy and confidentiality rules and regulations, following the local and national laws concerning the well-being of human participants in clinical studies, and comply with various other hospital policies.
